

Expeditions	Drilling vessel	Year	Drilling location
Leg 201: Controls on Microbial Communities in Deeply buried Sediments, Eastern Equatorial Pacific and Peru	<i>JOIDES Resolution</i>	2001	EEZ
Exp. 329: South Pacific Gyre Microbiology	<i>JOIDES Resolution</i>	2006	International waters
Exp. 336: Mid-Atlantic Ridge Flank Microbiology: Initiation of long-term coupled microbiological, geochemical, and hydrological experimentation within the seafloor at North Pond, western flank of the Mid-Atlantic Ridge	<i>JOIDES Resolution</i>	2010	International waters
Exp. 366: Mariana serpentinite mud volcanism: geochemical, tectonic, and Biological processes	<i>JOIDES Resolution</i>	2016	International waters
Exp. 331: Deep Hot Biosphere	<i>Chikyu</i>	2010	EEZ
Exp. 337: Deep Coalbed Biosphere off Shimokita: Microbial processes and hydrocarbon system associated with deeply buried coalbed in the ocean	<i>Chikyu</i>	2012	EEZ
Exp. 370: T-Limit of the Deep Biosphere off Muroto (T-Limit)	<i>Chikyu</i>	2016	EEZ
Exp. 347: Baltic Sea Basin: paleoenvironmental evolution of the Baltic Sea Basin through the last glacial cycle	Mission Specific	2013	EEZ
Exp. 357: Atlantis Massif Serpentinization and Life: Microbiological, alteration, and tectono-magmatic processes in young mafic and ultramafic seafloor	Mission Specific	2015	International waters
